Report generated with comparative analysis against all other participants reported as average and top 20%

No additional group report generated.

Additional group report generated with comparisons against all others in the group

End of Benchmarking year. All data processed and electronic copies of report sent via email.

KEY STRENGTHS

"Working alongside Agrista has allowed us to identify areas of our business to improve on and create a set of objectives and measurable targets to aim towards. The benchmarking group has created a network of likeminded people with common set of goals and aspirations. Through better practices established we have seen a significant improvement in the financial performance of our business whilst maintaining pastures and animal husbandry. "

Tom ~ Hicks Beef, Holbrook

Understanding the system and its influence on simplicity, productivity and profitability.

Rigorous methodology to assess and report farm performance measures.

Optimising the efficiency of scarce resources including capital, feedbase and human resources.

Contextualise and interpret the information to deliver value.
